

Course Objectives

This course is designed for international residents and Otolaryngologists, although it is open to anyone with an interest in Otology.

The objectives of this course are to give a broad based exposure to general topics in Otology, so that upon completion of the course, one will have a greater comfort level with the understanding of ear disease and its management.

The laboratory sessions are designed to teach middle ear anatomy and correlate this with basic surgical approaches to ear diseases.

Didactic sessions held on the Pacific Neuroscience Institute Campus are designed to review the basics of chronic ear disease, OCR, acoustic tumors, the role of the endoscope in ear surgery, the reading of the CT scan, and how to deal with idiopathic and iatrogenic complications.

Course Faculty

Dr. Mesele Bogale, M.D.
Director of RAMA ENT Hospital
Adama, Ethiopia

Dr. Yohannes Shiferaw, M.D.
Director of RAMA Temporal Bone Lab
Adama, Ethiopia

Alex Bien, MD.
Professor of Otolaryngology-Neurotology
University Oklahoma School of Medicine
Oklahoma City, OK., USA

Richard Wagner, MD.
Clinical Otologist
Director of Global ENT Outreach
New Mexico, USA

Mateen Soleman, MD.
Professor of Radiology USC Med School
Virtual Instructor Online
Los Angeles, CA

Nega Kiros, MD.
ENT Surgeon
Lab Instructor

African Ear Foundation

INTERNATIONAL TEMPORAL BONE COURSE

January 15-17, 2027
RAMA ENT Speciality Hospital
Adama, Ethiopia

Course description

INTENDED AUDIENCE

This course is intended for Otolaryngologists and residents/fellows in training with an interest in the fundamentals of successful otologic surgery via the study of the temporal bone anatomy, disease management, and applied surgical techniques.

COURSE OVERVIEW

After participating in this CME activity, participants should be able to describe and discuss:

- basic and applied anatomy of the temporal bone
- understand the basic use of the endoscope in otologic surgery
- approach to surgical management of ear disease
- evidence based approaches to otologic evaluation and diagnosis

Topics to Be Presented

- Temporal bone anatomy
- Surgery of chronic ear
- Cochlear implants
- Radiology of the temporal bone
- Iatrogenic and Idiopathic complications
- Ossicular reconstruction
- Stapedectomy
- Management of acoustic tumors
- Surgery for vertigo
- Endoscopic ear surgery

Procedures demonstrated

- Canal wall up mastoidectomy
- Canal wall down mastoidectomy
- Facial recess and extended facial recess
- Endolymphatic sac decompression
- Facial nerve identification
- Middle cranial fossa approach
- Cochlear implantation
- Endoscopic ear surgery

Course Location

RAMA ENT Speciality Hospital
04 Kebele
Oromia region Ethiopia
Adama, Ethiopia

Course Inscription fee

Lecturers only	Free
Ethiopia residents	\$50.00
Ethiopian ENT	\$200.00
African residents	\$200.00
African ENT	\$300.00
